

Page Prototype

Step 1: Design an Event

Competitor site 1: <https://www.quizony.com/what-should-i-do-tonight/index.html>

- Title: What are you going to do tonight
- Question: one question per page
- 4 different choices (below the question)
- The progress you have made (in the form finish/total)

Competitor site 2: <https://www.buzzfeed.com/smirnoffcanada/what-should-you-actually-do-tonight>

- Title: At the very top of the page
- Question: All the questions is in one page (build in a giant picture)
- The choices, which are represented as different picture

My site: <site name here>

- Title: What should I do tonight
- Question: All the questions in one page
- Choices: 4 different choices for each question (in word instead of picture)
- Progress Bar: The progress you made before answering each question

Step 2: Prototype an Event Area

Here is a prototype of how the Event area will look

What Should I Do Tonight

Question 1/10:
What is your hobby?
A basketball
B reading
C study
D cooking

Question <question number / total question>:
<The Question>
A <choice>
B <choice>
C <choice>
D <choice>

Step 3: Prototype the Event Page

Here is a prototype that shows how the Event area fits in a wider page

What Should I Do Tonight
